Auto Scan

1. Tap "Auto Scan" and follow the App instructions to connect the Wi-Fi Smart Plug to your network.

Quick Guide of Using Smart Life App

Smart Life App can use **Program, Countdown, Random** and **Repeat** functions.

- **Program**

  You can set the on/off time for a 7-day period with a 1-minute interval according to your needs. Every program you set repeats weekly.

- **Countdown**

  The smart plug will remain in its current state (on or off) until the set countdown is over. When the set countdown is over, it will turn it off if it was on, and turn it on if it was off. When manually switched on or off during the countdown mode operation, the countdown mode is automatically terminated.

- **Random**

  You can set the start and end time to randomly control the installed lights or other devices within the set time when you are away from home, make it appear as if someone is at home to deter intruders.

- **Repeat**

  You can set the duration of each on and off time, the start and end time according to your needs. The on/off schedule will repeat between the start and end times. For example, you set a period from 9:00 Am to 6:00 PM, turn on your electric fan for one hour, and off for two hours. The outlet will repeat on/off from 9:00 AM to 6:00 PM.

> **Note:** If you want to delete the schedule you set, please press and hold the schedule. When the dialog box appears, tap "Confirm" to delete the schedule.

Quick Guide of Using Google Home

- **Preparation**

  1. A Google Home device, or a phone with Google Assistant.

  2. Latest Google Home App and a Google account.

  3. The device display language must be set to English US.

  4. Smart Life App and a related account.

  5. Wi-Fi Smart Plug

  Note: Sign in to the Smart Life Account, add the device, then change the name to an easily recognized word or phrase, like "bedroom light" or "landscape light".

- **Add Device to Google Home App**
  1. Open Google Home App.
  2. In the Google Home App, locate and tap "Set up device".
  3. Find or search and tap "Smart Life" on the list.
  4. Enter your Smart Life account and password, then tap "Link Now".
  5. After you assign a room for a device, it will be listed on the Google Home App.

- **Control Your Device**

  Now you can control the added device through Google Home. For example, if the device name is "bedroom light" or "landscape light" the supported voice commands are:

  Ok Google, turn on/off "bedroom light".

  Ok Google, turn on/off "landscape light".

Quick Guide of Using Amazon Echo/Alexa

- **Preparation**
  1. An Echo device, or a phone with Amazon Alexa.
  2. Latest Amazon Alexa App and a Amazon account.
  3. Smart Life App and a related account.
  4. Wi-Fi Smart Plug

  Note: Sign in to the Smart Life Account, add the device, then change the name to an easily recognized word or phrase, like "bedroom light" or "landscape light".

- **Add Skill to Alexa App**

  1. Open Amazon Alexa App.
  2. In the Amazon Alexa App, locate and tap "Browse Skills".
  3. Find or search and tap "Smart Life" on the list, then tap "Enable To Use"
  4. Enter your Smart Life account and password, then tap "Link Now" to link your Smart Life account.
  5. If "Alexa successfully connected to smart life" is displayed, the Alexa account is linked with the Smart Life account.

- **Discover Device**

  1. An Echo device or a phone with Amazon Alexa needs to discover your Wi-Fi smart plug before the control. You can say "Alexa, discover device" to Echo, or you can also search "Discover Device on App to discover the Wi-Fi smart plug. Discovered devices will be shown in the list.

  Note: Every time you change the name of devices on the Smart Life App, Echo much re-discover devices before the control.

- **Control Your Device**

  Now you can control the added device through the Echo device or a phone with Amazon Alexa. For example, if the device name is "bedroom light" or "landscape light" the supported voice commands are:

  Alexa, turn on/off "bedroom light".

  Alexa, turn on/off "landscape light".
